

GUYANA UPDATE

Another nation we ship to on a regular basis is Guyana. Guyana is a small country, about the size of Idaho, located in northern South America and is one of the poorest countries in South America.

Thirty-five percent of the Guyanese population lives below the poverty line, with indigenous people being disproportionately affected. Urban slums and rural farming communities suffer from inadequate healthcare and poor educational facilities. The rural poor are often completely cut off from any sort of population center or modern services. Among the urban poor, families are often forced to live in hazardous conditions in makeshift shacks.

So far this year, we have sent **5** shipments to Guyana and have more planned. Our ongoing partnership with Food for the Poor ensures that each shipment will get to the people !

We are deeply grateful for each of you, our Angels and pray that God will continue to bless you over and above beyond the beyond!
